iPad at 10

1-1 minutes

Dan Romero

The iPad turned 10-years old this week.

I use an [11-inch iPad Pro with LTE](#) with Google Fi as my primary device while traveling. Always-on internet virtually anywhere on Earth on a laptop-sized device is terrific. Last year I also found myself using the iPad as my preferred Kindle device—I love continuous scroll as a way to skim through a too-much-detail-for-a-layperson section of a dense non-fiction book.

Here's a round up of some good essays looking at the iPad at 10:

- [The iPad Awkwardly Turns 10](#) by John Gruber
- [The Tragic iPad](#) by Ben Thompson
- [Tweetstorm](#) and [essay](#) by Steven Sinofsky
- [iPad in 2020](#) by Dustin Curtis

And while not a reflection on 10 years of iPad, a bonus [in-depth iPad Pro review](#) from Paul Stamatiou.
